Application

Increase Production - Reduce Cost

Increase your production further by reducing
downtime caused by changing coils. Dynaric’s
XL coils are still produced using the same
high quality materials as our standard coils
but with more footage therefore eliminating
up to 30% of your coil changes.

The ST1-HS is the operator-less machine equipped with variable speed powered belts, eliminating the need for an operator. Although the unit can be switched to manual and used like an offline unit, the ST1-HS is designed to operate automatically using photo switches to detect incoming packages. The ST1-HS is equipped with an automatic strap feeding system as well as an “end of strap” sensing system with automatic strap discharge once a coil has been completed. To decrease downtime due to frequent coil changes the ST1-HS is equipped with an externally located dispenser that can utilize Dynaric XL coils.

**At A Glance**

- **Capable of up to 48 bundles per minute**
- **Adjustable strap width** (from 5 - 9 mm), no additional parts required
- **Automatic strap feed**
- **Strap end sensing system, automatic discharge of remaining strap**
- **Up and downstream interlock**
- **Height adjustable feet**
- **Power cable, length 40”**
- **PC control with operating unit and display signal processing via PLC control unit**
- **Automatic strap tensioning, depending on height of bundle**
- **Hinged tabletops**
- **Table belt drive steplessly adjustable (frequency inverter)**
- **Quick changing device for strap dispenser**
- **Dissipation Fan**
