Certified Minority Owned Business
The AM659 is a high speed automatic heat seal strapping machine that is
designed for ease of operation by equipment operators. It is capable of applying
up to 50 straps/minute to a wide range of sizes and types of packages.
The AM659 can operate using 9mm and 12mm wide plastic strap. Because of its ability to use many sizes of strap the AM659 enables customers to choose the best Dynaric plastic strap for their budget and packaging requirements. The AM659 has many standard features that include automatic coil feed system, strap loop ejector, short feed detector, refeed system and precision electronic tension control. These user friendly features combine to increase strapping performance and reliability, as well as providing ease of operation for the equipment operator.
