DF117 HZT

The DF117HZT is a state-of-the-art strapping machine designed for integration into the horizontal signature stacker/bundlers currently being offered to the printing industry. This plastic strapping machine can be specified as original equipment on new bundlers or retrofit into your existing stacker/bundlers to improve

reliability, reduce downtime therefore reducing your cost per signature log.

Standard Features

- Cycle time of 2 seconds (depending on arch/package size and your conveyor speed)
- Strap up to 30 packages per minute.
- Side seal design for heavy package weight and dusty product environments.
- Control pad easily adjusts timer functions, heater temperature setting and seal time.
- Digital display reports operational status, including error code read out.
- Utilizes 1/2" strapping material.
- Adjustable external tension; allows for a wide range of packages to be strapped with just the right amount of tension every time.
- Operates on 220V 3-phase power; with optional 440V 3-phase on special order basis.
- Available in a wide range of arch sizes.
- Casters allow for easy mobility.
- Audible end of strap warning signal.
- Easy strap feeding function.
- External adjustable tension control.

Personalize Your Packages

Printed strapping is an economical way to identify special products, display your company logo and information or even for product security and more. Dynaric's high quality strapping can now be custom printed using **two colors**.
