Dynaric, Inc.

The DTFW-1000 band strapping tool is a must have tool for banding unitized bundles and securing product to a pallet.

Unlike pneumatic band strapping tools, the DTFW-1000 uses a 12V NiCd battery to provide you up to 200 cycles before recharging is needed. This doesn't mean production has to stop, our DTFW-1000 comes with two batteries, one to use while the other is charging.

The DTFW-1000 band strapping tool can use virtually any size of Dynaric Ultraband, polypropylene, and polyester strapping allowing you to have the strap you need to get the job done right.

Economic

- Energy-efficient strapping system
- More cycles per battery charge
- Cost efficient
- Service-friendly construction
- High quality

Environmental-friendly

New motor design with the latest environmental-friendly battery technology from Bosch:

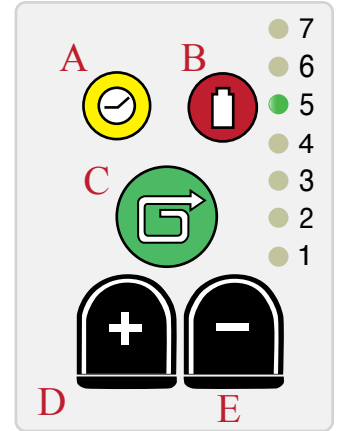

- High efficiency ratio
- No memory effect
- Recharging at any time
- High number of strappings

The DTFW-1000 band strapping tool comes with 2 batteries and a charger

Controls at your fingertips

- A. Seal Time Adjustment
- B. Battery Life
- C. Tension Adjustment
- D. Increase Value
- E. Decrease Value

Weight (incl. battery)	3.9kg (8.6 lbs)
Dimensions	Length: 375mm Width: 130mm Height: 140mm
Strap tension	400-2000N
Tension speed	260mm/s (10.2"/s)
Sealing	Friction weld
Voltage	Battery charger: 100/240V Bosch battery: 12V/2.4Ah NiCd
Charging time	60 minutes
One battery charge	100-200 cycles depending on strap, strap tension and package
Service life	Up to approx 2000 charges
Strap	Polypropylene and Polyester
Strap width adjust to	12-13, 15-16mm
Strap Thickness	PP (0.6-1.0mm) PET (0.5-1.0mm)
