

CLEAR STRAP FOR NEW POSTAL SERVICE REGULATIONS APPS SYSTEM

The USPS bulletin 22166 outlines a new mailing standard for strapping to be of a clear and smooth surface type for bundles of flat-size and irregular parcel mail pieces that will be processed on their automated package processing system (APPS). **The USPS bulletin does not mandate a strapping surface change** for standard mail in flat letter trays.

The United States Postal Service recommends that **strapping used for bundling be clear and smooth, and have less than 70 percent haze. Clear smooth strapping that is tightly secured around the bundle does not obstruct visibility.** Compliant strapping should not contain any seams or texture marks that obscure address characters...

Dynaric currently meets the new USPS requirements with their line of "Postal Bundle" products.

Dynaric Postal Bundle Strap

• P2170-8 • P2170-9 • P981-8 • P-2216-9 • P1122

All strapping listed above have a clear smooth non-embossed surface with a haze factor below 20.

Dynaric Postal Bundle Machines

- Easy coil loading
- Minimal maintenance and lubrication required
- Limited number of moving parts
- Up to 50 straps per minutes
- Uses 5mm - 6mm strap
